

## Confidential Product Study Guide

Tile Armor Maintenance Problem Solvers

June 10, 2008

- Product:** **Super Seal WB**
- Package Sizes:** 1 Gallon (4 Gallons/case)  
24 Oz. Bottle (12- 24 oz. Bottles per case)
- Product Description:** ***Super Seal WB*** is a non-flammable water based fluoro acrylate polymer sealant, penetrant and protector for grout, natural stone, non-glazed porous tile substrates. ***Super Seal WB*** is incredibly safe for both the applicator and the environment. ***Super Seal WB*** does not appreciably change the appearance of the treated surface yet it provides superior protection to avoid and promote easy clean-up for grease, oils and organic stains. ***Super Seal WB*** is easy to apply.
- Where to Use:** The primary usage for ***Super Seal WB*** is sealing cementitious grouts. This type of grout should be sealed after installation to prevent the color from staining. The application of ***Super Seal WB*** does not change the natural color of the grout, but will prevent the penetration of moisture, simplify maintenance, and help prevent staining or discoloration. In addition to grout ***Super Seal WB*** may be used on marble, granite, limestone, sandstone, brick, slate, terra cotta, and concrete.
- How to Apply:** ***Super Seal WB*** is ready for use as supplied and should not be further diluted. Always test on a small area to determine suitability for the intended use. If applying to existing grout, first clean and condition grout with ***Pro Restore***. Surface should be clean, dry free from waxes, coatings, or finishes. Apply to surface in a thin even coat with a low pressure compression sprayer, brush, mop, lambs wool applicator, or non-linting micro fibre cloth. A second coat may be necessary on more porous surfaces. Apply second coat before the first coat completely dries. Some highly polished such as granite or marble may require light buffing with a clean cloth. The treated area should be kept dry and free from soils for at least 24 hours.
- How to Maintain:** Dust mop surface regularly. Damp mop as soil conditions

dictate using a solution ***Tile Armor Sunbrite pH Neutral Cleaner and Conditioner*** to keep sealed floors looking great!

**Product Benefits:**

1. Non-Flammable!
2. No odor
3. Easy to use.
4. May be applied to damp grout.
5. Long lasting.
6. No silicone.
7. Does not build up.
8. Protects against oil and grease.
9. Does not change color of grout or tile.
10. Easy clean-up.
11. No V.O.C's
12. Allows natural stone to breath
13. Spreads and coats evenly.
14. Long term protection.
15. Dries essentially invisibly.
16. Easy to maintain.
17. Excellent coverage.
18. Cost effective solution to a difficult maintenance problem.
