Tile Armor Maintenance Problem Solvers

June 10, 2008

<u>Product:</u>	<u>Pro Restore</u>
<u>Package Sizes:</u>	1 Gallon (4 Gallons/case) 24 Oz. Bottle (12- 24 oz. Bottles per case)
<u>Product Description:</u>	<i>Pro Restore</i> is an amazing labor saving grout restorer and conditioner. <i>Remember</i> this product is a restoration product and not to be used for grout and tile maintenance. <i>Pro Restore</i> quickly returns badly soiled and stained grout to its original appearance.
<u>Where to Use:</u>	The primary usage for <i>Pro Restore</i> is restoring cementitious grouts to their original appearance. <i>Pro Restore</i> will not so very much for epoxy grouts. <i>Pro Restore</i> should not be used on marble polished stone or terrazzo. Glazed ceramics, quarry tile are perfect applications for <i>Pro Restore</i> .
<u>How to Apply:</u>	<i>Pro Restore</i> is ready for use as supplied and should not be further diluted. Always test on a small area to determine suitability for the intended use. If the grout is heavily built up with a greasy soil it should be pre cleaned with a solution of <i>Super Green</i> . The product performs best when the grout and tile surfaces are dry. However, if time is an issue acceptable results can be obtained on a damp floor. Wear chemical resistant gloves and eye protection. Apply to grout lines by pouring or use a mop or brush to distribute over the surface to be restored. Allow <i>Pro Restore</i> to remain on the surface for about 15 minutes. Agitate with a stiff bristled brush if possible. Rinse floor with clear water until rinse solution is clear.
<u>How to Maintain:</u>	Dust mop surface regularly. Damp mop as soil conditions dictate using a solution <i>Tile Armor Sunbrite pH Neutral Cleaner and Conditioner</i> to keep sealed floors looking great!
<u>Product Benefits:</u>	<ol style="list-style-type: none">1. Fast acting formulation!2. Labor saving.3. Easy to use.4. May be applied to damp grout.

5. Low odor.
6. Non-flammable.
7. No harmful solvents.
8. Excellent coverage.
9. Does not change color of original grout or tile.
10. Easy clean-up.
11. Cost effective solution to a difficult maintenance problem.
