

Confidential Product Study Guide

Tile Armor Maintenance Problem Solvers

June 10, 2008

<u>Product:</u>	<u>SuperGreen/Super Green RTU</u>
<u>Package Sizes:</u>	4x1 Gallons/Case (CONCENTRATE) 24 Oz. Bottle (12- 24 oz. Bottles per case with sprayers) RTU
<u>Product Description:</u>	<i>SuperGreen and Super Green RTU</i> are eco-friendly, green safety cleaners. These revolutionary effective problem solvers contain no petroleum solvents, harsh alkalies or acids yet out perform most of the standard cleaning products available in the marketplace. Both SuperGreens quickly remove greasy dirty soils from a variety of substrates that are not harmed by water. SuperGreen RTU is a convenience package and is supplied in a Ready to Use form.

SUPERGREEN/SUPERGREEN RTU introduces a new class of Environmentally acceptable performance products from Tile Armor. **SUPERGREEN/SUPERGREEN RTU** are high powered performance cleaners that out perform solvent based cleaners and simultaneously meets the requirements of a Green Eco-Friendly maintenance solution.

SUPERGREEN is an effective, versatile cleaning, product that has no V.O.C. component, is biodegradable, and highly concentrated for economy in usage.

SUPERGREEN/SUPERGREEN RTU contains no "Butyl" solvents, no petroleum solvents, no hydrocarbon solvents, no chlorinated solvents, and no terpene products, and yet will provide cleaning performance that rivals products containing these types of solvents.

SUPERGREEN/SUPERGREEN RTU contain no ethoxylated phenolic surfactants which have been industrial standards for years. These compounds are currently under investigation as endocrine disrupters, "potentially causing adverse reproductive effects of the types seen in wildlife exposed to polluted waters.

In addition, **SUPERGREEN/SUPERGREEN RTU** are totally biodegradable products.

The EPA is the driving force for Federal, State Purchasers to buy "Green" Products. This mandate spills over into the public sector in that any business doing subcontracting with the Government will be forced to buy these products as well. Insurance companies will also be placing emphasis on these products. Our industry is in the very early stages of significant change.

The next transformation will be in the area of V.O.C's (Volatile Organic Compounds). In the very near future we will see a whole new "Next Generation" of products.

In a guide for federal purchasers the EPA states, "That using products that perform well and that have positive environmental attributes such as biodegradability, low toxicity, low volatile organic compound (VOC) content, can reduce the environmental impact of routine cleaning activities while also ensuring cleaning effectiveness."

SUPERGREEN/SUPERGREEN RTU meet and exceeds these requirements.

Where to Use:

- | | |
|------------------------------|--------------------------------|
| 1. Hotels | 16. Office Buildings |
| 2. Motels | 17. Shopping Malls |
| 3. Nursing Homes & Hospitals | 18. Maintenance Shops |
| 4. Country Clubs | 19. Water Departments |
| 5. Industrial Plants | 20. Recreational facilities |
| 6. Tool and Die Shops | 21. Prisons |
| 7. County Courthouses | 22. Supermarkets & Food Plants |
| 8. Airports | 23. Research laboratories |
